

Noor Gaffar

Mobile: +201287153500 | Email: gafernour@gmail.com

LinkedIn: <https://www.linkedin.com/in/noor-gaffar>

Education:

Port Said University, Egypt

Bachelor's degree in Electronics & Communication Engineering

2023-present

GPA: 3.9/4.0

Experience:

Data Engineering | DEPI - Digital Egypt Pioneers Initiative

Dec 2025 – Present

- Applied **SQL** and **Python (Pandas, NumPy)** to analyze datasets and build **data pipelines** for practical use cases.

IoT system Developer internship | Samsung Innovation Campus (SIC)

Aug 2025 – Oct 2025

- Designed and implemented **IoT systems** using **Raspberry Pi** and **Electronics**
- Built **sensor integration** and **IoT communication protocols** (MQTT, HTTP, CoAP)
- Applied **Node.js** and **Node RED** to build dashboards and telegram bot for alerts
- Used **Linux**, **Git/GitHub** for version control and platforms (Blynk)

Python Development Trainee | Samsung Innovation Campus

Jul 2024 - Sep 2024

- Gained proficiency in **Python**, **OOP**, **Tkinter (GUI)**, **JSON** and **Pandas**
- Built a **social media app** and **online shopping website**

Be An Ambassador Program

Sep 2024 – Oct 2024

- Completed training on the **UN Sustainable Development Goals (SDGs)**
 - Delivered technical and business presentations to judges and mentors
 - Developed and pitched an **AI powered recycled app idea "Dawarha"** in the final competition
-

Projects:

Bolt Energy Harvesting Shoe | AAKRUTI Competition

Jul 2025 – Oct 2025

- **Led electrical circuit design** using **Multisim** for an energy-harvesting shoe that converts kinetic energy into electrical power using magnetic induction.
- Co-developed the **business plan** and **technical presentation**
- Achieved **1st place overall Egypt** and **2nd place in presentation**

Smart Farm Management System | IoT Project (SIC)

Aug 2025 – Oct 2025

- [GitHub Repository](#)
- Built an **IoT-based monitoring system** using **Raspberry Pi**, **MQTT**, and **Node-RED** to automate alerts and reduce manual farm inspection.
- Created a real-time **Node RED dashboard** and **Telegram alert system**
- Automated worker attendance and tracking and task assignment via email integration

Smart Cooling System | IoT Project

Sep 2025

- [GitHub Repository](#)
- Built an IoT based environment controller using DHT11 sensor to automate cooling fans and alerts based on temperature and humidity thresholds
- Designed MQTT and Blynk for remote dashboard monitoring

Gesture Controlled Robot Car | University Project

May 2025

- [GitHub Repository](#)
- Built a robot car controlled by hand gestures using Arduino uno
- Established a wireless control via HC-05 Bluetooth module

"Ecosta" Social Enterprise | Empower Hub Competition (2nd place)

Mar 2024

- Cofounded a women-led venture that upcycles seashells into sellable products
- **Won second place** and secured **seed fund** in the competition

Security Alarm System | PMMC2 Competition (3rd place)

Apr 2024

- Designed and hand soldered a laser security circuit with transistor switch and buzzer
 - Placed 3rd between +20 teams
-

Extracurricular Activities:

Autonomous Team Member | PSU Racing Team

Jun 2024 – Present

- Organized **Two SolidWorks** events for engineering students.
- Represented the team in competitions like AAKRUTI and MathWorks drone simulation

Operations Team Member | ICPC PSU

Sep 2024 - Present

- Organized weekly programming training and contests for 50+ students
- Enhanced C++ problem-solving through competitive programming

Public Relations Members | Port said Engineering Day (PSED)

Feb 2024 – Present

- Contacted speakers, helped organize and coordinate event day for +200 attendees

Volunteer | Life Makers Foundation

Jan 2024 - Apr 2024

- Supported a disability inclusion campaign through event coordination
 - Assisted in and donation collection for the campaign
-

Technical Skills:

- **Programming:** C++, Python (OOP, Pandas, Tkinter), SQL, MATLAB/Simulink
- **IoT & Embedded Systems:** Raspberry Pi, Arduino, Sensor Integration, MQTT, HTTP, Node-RED
- **Tools & Platforms:** Git/GitHub, Linux, SolidWorks, Blynk IoT, Microsoft Office
